Time is Money - card & coin meters from the UK's leading manufacturer

TOILET BLOCK EQUIPMENT – *Nov 2006* **Control of cleanliness in toilets and extra income generation**

Keeping control of the access and the use of lighting in leisure centres in Ireland is no problem for Smart Controls. They have installed control systems in a number of tennis courts, squash courts and on sun beds allowing the user timed access to the facilities by using coin or card operated timers provided by Leisure Controls International of Blandford Forum in Dorset.

This technology has also been used to control access to toilets in shopping centres. Unlike the timers used for accessing and controlling the lights in the leisure centres, access to the toilets simply allows the lock to be opened and when closed again resets itself ready for the next user. "It does not control the lights as this would be very difficult to assess the time needed for each customer." said Lou Reed of Smart Controls. This means that the user does not have to lock the door behind them when inside and simply allows the door to close behind them when they leave. This means that there is less likelihood of vandalism and the cleanliness can be better controlled. It is also a way of ensuring income from the customers to pay toward the up keep of the toilets.

A wide variety of timers are available for use with almost all electrically operated systems and are easy to fit, providing confidence that the customer is doing all they can to help the environment at the same time as controlling their costs.
